Mineral	unit	volume	Mineral	unit	volume
Calcium	ppm	965.40	Iron	ppm	0.21
Phosphorus	ppm	1.08	Copper	ppm	0.07
Magnesium	ppm	36.87	Zinc	ppm	0.16
Sodium	ppm	483.30	Manganese	ppm	0.44
Potassium	Ppm	29.71	Selenium	ppm	0.07
Chlorine	%	0.15	Iodine	ppm	16.05

Effect Guide

Activation of effective bacteria native to the large intestine

Negative dilution supply

Immunity boost & Reinforcement of disease prevention

increase in colon health & enhance digestion

Induction of healthy body changes

Immunity increase

BowjoA is a physiological activity enhancing agent that has a wide range of effects, from odor reduction, immunity enhancement, and constitution improvement.

DAILY RECOMMENDED ALLOWANCES FOR MINERALS

The information in this pamphlet is based on Nutrient Requirements of Dogs and Cats, a technical report issued by the National Research Council as part of its Animal Nutrition Series.

	FUNCTIONS	DAILY RECOMMENDED ALLOWANCE*	SIGNS OF DEFICIENCY/ EXCESS
Calcium	Formation of bones and teeth; blood coagulation; nerve impulse transmission; muscle contraction; cell signaling	1 g	Nutritional secondary hyperparathyroidism; significant decreases in bone mineral content, which can result in major skeletal abnormalities Different types of skeletal aberrations, especially in growing puppies of large breeds
Phosphorus	Skeletal structure; DNA and RNA structure; energy metabolism; locomotion; acid-base balance	0.75 g	Enzyme functions; muscle and nerve-cell membrane stability; hormone secretion and function; mineral structure of bones and teeth
Magnesium	Enzyme functions; muscle and nerve-cell membrane stability; hormone secretion and function; mineral structure of bones and teeth	150 mg	Reduction in weight gain, irritability, and convulsions in puppies; hyperextension of carpal joints and hind-leg paralysis later in life
Sodium	Acid-base balance; regulation of osmotic pressure; nerve impulse generation and transmission	200 mg	Restlessness; increased heart rate, water intake, and hemoglobin concentration; dry and tacky mucous membranes
Potassium	Acid-base balance; nerve impulse transmission; enzymatic reactions; transport functions	1 g	Poor growth in puppies; paralysis of neck muscles and rear legs and general weakness later in life
Chlorine	Acid-base balance; transfer of extracellular fluids across cell membranes	300 mg	Reduced weight gain and weakness in puppies
Iron	Synthesis of blood components; energy metabolism	7.5 mg	Poor growth; pale mucous membranes; lethargy; weakness; diarrhea At acute levels, dangerous oxidative reactions that lead to gastrointestinal and other tissue damage
Copper	Connective tissue formation; iron metabolism; blood cell formation; melanin pigment formation; myelin formation; defense against oxidative damage	1.5 mg	Loss of hair pigmentation in puppies; anemia
Zinc	Enzyme reactions; cell replication; protein and carbohydrate metabolism; skin function; wound healing	15 mg	Poor weight gain; vomiting; skin lesions
Manganese	Enzyme functions; bone development; neurological function	1.2 mg	No studies of deficiency in dogs
Selenium	Defense against oxidative damage; immune response	90 µg	Anorexia; depression; breathing discomfort; coma; muscular degeneration
Iodine	Thyroid hormone synthesis; cell differentiation; growth and development of puppies; regulation of metabolic rate	220 µg	Enlargement of thyroid glands; dry, sparse hair coat; weight gain Excessive tearing, salivation, And nasal discharge; dandruff

*Daily needs for an adult dog weighing 33 pounds, consuming 1,000 Calories per day. g = grams; mg = milligrams; µg = micrograms
