HISTORY

We are second-generation management.
Our products are ceramic-based.
In 1980, he founded "Pilseung yeon mi", a ceramic polishing stone company, and has steadily developed various ceramic products for more than 40 years for hands and feet without skin irritation. Its subsidiary, Victory Nail, was launched in [illegible] to become a company that researches and shares

Its technological prowess is recognized not only in Korea but also by leading overseas brands. In the meantime, we have supplied products produced with our unique technology to many overseas brands such as Walmart, Titania, Tweezerman, Revlon, and The Body Shop. Even now, continuous research is being conducted to produce better quality ceramics. Meet hygienic ceramic nail care products.

Pros of ceramic stone

*** Polishing function of ceramic materials-**
Ceramic has great hardness, so it is used as an ingredient in abrasives and cutting tools, and is also famous as a raw material for knife sharpening products (whetstones). By combining ceramic with nail tools, you can grind calluses without damaging them (polishing) and remove cuticles (cutting tool)

*** Ceramic material resistant to scratches and corrosion-**
It is a highly durable material and heat resistant to processing at high temperatures and high pressure and resistant to scratches and corrosion, and the moisture absorption rate is close to zero. For this reason, bacteria and mold do not occur, and also good for hygiene management.

*** Wash lightly with running water-**
If you wash it in water and dry it, it can be used semi-permanently rather than disposable. Even if it comes into contact with water, it dries quickly.

How to use each type of stone

[PUSHER] 1. Apply cuticle remover or oils close to cuticles.

2. Clean up the cuticle line by starting with scrubbing the side part of a fingernail in one line. Remove loosened cuticles and hangnails by gently scrubbing in a motion.

[NAIL FILE] File for shaping nails and removing calloused skin on side of nails. (Neatly groom nails with filer)

[FOOT FILE] You start off with the coarse side to take care of the dead skin, and then use the smooth side to finish.

Pros of victory ceramic products

*** The best angle-**
The stone of the pusher is angled for effective exfoliation of the nails. Unlike other ceramic pushers which can cause scratches when the stone is uneven or too low. Our ceramic pushers have sharp slopes and clean lines, which are very convenient for users to use and easy to take care of.

*** Very easy and convinient nail care-**
Easily used at home with no additional materials needed

*** Portable pen size for easy and convenient nail care**

*** Suitable for both professionals and at home-use**

Victory Nail a Product Development System

High quality
Our manufacturing technology is based on more than 40 years of ceramic technology research know-how. Its technological prowess is recognized not only in Korea but also by leading overseas brands.

Stable production line
Establishment of automation system by introducing ICT process to production facilities.

User-friendly design
New designs are released every year that reflect customer needs.

Patented ceramic cuticle pusher with on/off cuticle oil function!

Cuticle remover that combines oil and ceramic pusher in one product.
The ceramic particles are fine and retain oil well,
and the cross section of the ceramic is cut cleanly.
You can remove hangnails and take care of the edge lines of your nails to avoid damaging the cuticle line.

Rubber coating on the handle adds anti-slip and aesthetic elements

How to use

1. Push down firmly in direction of arrow to "on" and wait 5 minutes.
2. Soon you will see oil ceramic pusher.
3. Clean up the cuticle line by starting with scrubbing the side part of a fingernail in one line. Remove loosened cuticles and hangnails by gently scrubbing in a circular motion.
4. Finish by cleaning nails and pusher. Pull out to "off" position and close lid on ceramic tip.
